1. Go to the Process for Obtaining a Patent

The Resources section of the Patents page contains information about patent applications and searching for patents. It also links to the Search Patent database.

To access the Internet-based Resources at USPTO, go to the PATENTS' Ignition located on top of the USPTO homepage. This section provides links to various resources and information about patent applications and processes.
Ensure your IP assets are protected globally.

- Protect your IP assets globally.
- Educate yourself about IP protection in foreign markets.
- Be vigilant in the marketplace.

Steps:
1. Protection at Home
2. Protection Abroad
3. Global Enforcement

NOTE

Applicants applying for patents using the provisional application process have the opportunity to file an additional application after the provisional application has been published. This additional application will be processed as if it were a new application, and will be examined as if it were an original application. Applicants may lose the right to file patent applications under 35 U.S.C. 102(d) and 35 U.S.C. 112(a) if the provisional application is not filed before the priority date of the additional application. Applicants should be aware of these requirements in filing a provisional application.

A provisional application and filing fee can be mailed to:

USPTO Customer Center
P.O. Box 1450
Alexandria, VA 22313-1450

The provisional application and filing fee can be mailed to the USPTO Customer Center, P.O. Box 1450, Alexandria, VA 22313-1450.

For additional information, contact the USPTO Customer Center.

The provisional application must be filed within 12 months after the date of the earliest application, and must contain a description of the invention that is sufficiently clear and complete to enable the invention to be performed by others.

A provisional application must be filed in accordance with the provisions of 35 U.S.C. 111(a) and (b).

The provisional application is a non-provisional application and can be used to determine the priority date of an invention made after the provisional application is filed.

The provisional application is filed electronically using EFS-Web: The Provisional Application System.
